About Silver Line Laboratories

Silver Line Laboratories is a leading manufacturer of specialty contact lenses committed to advancing eye care through innovation, precision engineering, and clinical excellence. With decades of expertise in designing and manufacturing customized contact lens solutions, the company has become a trusted partner for eye care professionals in managing complex corneal and refractive conditions.

Mr. Gagan Sahni
Technical Director

The company offers a comprehensive portfolio of specialty contact lenses, including scleral lenses, orthokeratology (Ortho-K) lenses, prosthetic soft lenses, toric lenses, and customized lenses for keratoconus, post-surgical corneas, ocular surface disorders, and other irregular corneal conditions. Every lens is developed using advanced materials, modern manufacturing technologies, and evidence-based design principles to ensure optimal comfort, visual performance, and long-term ocular health.

At Silver Line Laboratories, education is regarded as an integral part of innovation. In addition to developing high-quality specialty contact lenses, the company is dedicated to enhancing clinical practice through professional training, research, and continuous knowledge sharing. This commitment led to the establishment of the CLEAR Fellowship Program (Contact Lens Education and Resources), a structured educational initiative designed to equip eye care professionals with advanced clinical knowledge and practical expertise in specialty contact lens fitting and patient management.
Through expert mentorship, hands-on clinical exposure, and a strong emphasis on evidence-based practice, Silver Line Laboratories continues to empower practitioners, improve patient outcomes, and contribute to the advancement of specialty contact lens practice.

SILVER LINE
LABORATORIES

MISSION

To empower eye care professionals through quality education, clinical excellence, and innovation in specialty contact lenses.

VISION

To be a leading institution in specialty contact lens education, advancing eye care through knowledge, research, and clinical expertise.

Experiential Learning

CLEAR™– Contact Lens Education and Resources

The CLEAR™- Contact Lens Education and Resources Fellowship follows a structured experiential learning model that seamlessly integrates theoretical knowledge with practical clinical application. The program is designed around four progressive phases guided observation, supervised hands-on training, independent case management, and reflective evaluation allowing fellows to systematically develop their clinical knowledge, technical skills, and professional confidence under the guidance of experienced mentors.

The intensive fellowship combines interactive lectures, laboratory workshops, live patient demonstrations, and supervised clinical sessions to maximize learning and skill retention. Participants receive personalized mentorship in patient assessment, specialty lens fitting, troubleshooting, dispensing, and follow-up care, while collaborating with fellow optometrists, ophthalmologists, and eye care professionals in a dynamic learning environment.

A distinctive feature of the program is exclusive exposure to Silver Line Laboratories' advanced specialty contact lens manufacturing processes, innovative lens designs, and customization techniques. This unique integration of clinical training with manufacturing insight provides fellows with a comprehensive understanding of specialty contact lens practice, enabling them to deliver evidence-based, patient-centered care and confidently manage complex clinical cases in their professional practice.
